

Q1	A B C D E F
Q2	A B C D E F
Q3	A B C D E F
Q4	A B C D E F
Q5	A B C D E F
Q6	A B C D E F
Q7	A B C D E F
Q8	A B C D E F
Q9	A B C D E F
Q10	A B C D E F

1. What period number does X belong to?

[1]

1

2

3

4

5

6

2. What group number does X belong to?

[1]

2

1

10

13

15

18

3. What are groups on the periodic table?

[1]

Clusters of metals in the periodic table

Columns that run vertically

Levels with increasing atomic numbers

Rows that run horizontally

Regions of stable isotopes

Sections with similar atomic masses

4. What are periods on the periodic table?

[1]

Rows that run horizontally

Groups of similar elements

Columns that run vertically

Regions with the same electron configuration

Areas of decreasing reactivity

Levels with the same atomic mass

5. How many protons does X have? [1]

5

10

13

15

18

20

6. How many electrons does X have? [1]

5

10

Total Points: [10]

[U2HW3 - W25 - Electron Configuration] 2

13

3

15

4

18

5

20

6

7. How many valence electrons does X have? [1]

10. Most of the periodic table of elements consist of elements that are: [1]

2

Non-metals

5

Metalloids (semi-metals)

8

Diatomic molecules

13

Synthetic elements

15

Metals

20

Noble gases

8. On the periodic table, which unknown element does X represent? [1]

Chlorine (Cl)

Argon (Ar)

Boron (B)

Nitrogen (N)

Sulfur (S)

Phosphorus (P)

9. This is the electron configuration for the neutral element X: 2, 8, 5. How many electron shells does it have? [1]

1

2
