Science Fair Project Reflection Paper Homework

Instructions: Now that the Science Fair is complete, please take a moment to reflect on your experiment, your group's teamwork, and the overall process. Answer the questions below thoughtfully and honestly.

PART 1: Project Overview

Look back at your KT board and project notes to summarize your scientific method below.

1. Experiment Title:

2. Investigation Question (What testable question were you answering?):

3. Hypothesis (Format: If..., Then...):

4. Variables:

- **Independent Variable** (*What you changed*): _____
- **Dependent Variable** (*What you measured*): _____
- **Controlled Variables / Constants** (*What stayed the same*): _____

5. Analysis (What trends or calculations did you find in your results/graph?):

6. Conclusion (Was your hypothesis correct? What did the experiment prove?):

PART 2: Group Member Evaluation

List yourself and up to 3 other group members. Describe exactly what each person contributed to the project (e.g., writing the proposal, gathering data, printing the matte paper, creating the graphs). Rate each member's effort and teamwork on a scale of 1 to 5 (1 = Poor, 5 = Excellent).

Group Member Name	What They Did (Specific Tasks & Contributions)	Rating (1-5)
1. (You)		
2.		
3.		
4.		

PART 3: Personal Reflection

7. What were your overall thoughts on the Science Fair? (Did you enjoy the process? Did you find it helpful that the project had to be a testable experiment answering a question rather than just a simple demonstration?)

8. Did your group have enough time to prepare? (Think about the whole process: thinking about your proposal during the winter holiday, getting your proposal approved by your teacher, doing the experiment safely, gathering data, and building the KT board.)

9. How successful was your final presentation board? (Did you manage to fit everything on one KT board? Did you make mistakes? How did you handle the mistakes you made?)

10. If you had the chance to do this science fair project again, what would you do differently next time? *(Would you choose a different topic, manage your time better, work with others, change your layout, or communicate differently with your team?)*
