

1. Which file name demonstrates professional version tracking according to classroom studio rules?

- toy_new_new.blend
- asdf12345.blend
- untitled_model_final.blend
- Cooper_StylizedToy_W01_V01.blend
- homework.blend
- project_really_really_done.blend

Answer:

2. What does a complete digital 'File Path' show?

- The exact folder directory address where a file is saved on storage.
- The total number of keys on the keyboard.
- The color of the computer screen.
- The price of the computer hardware.
- The speed of the computer cooling fan.
- The name of the classroom instructor.

Answer:

3. What is the native file extension for an editable project saved in Blender?

- .mp3
- .exe
- .blend

- .docx
- .png
- .pptx

Answer:

4. What are 3D computer graphics?

- Flat drawings created with colored pencils on paper.
- Printed black-and-white photos.
- Simple plain text documents with no visual elements.
- Pictures or digital models that have width, height, and depth in virtual space.
- A physical plastic model held in your hands.
- Audio recordings stored on a music CD.

Answer:

5. Where should food and drinks be kept during a computer laboratory session?

- Underneath the computer cables.
- Directly on the mouse pad.
- Completely away from workstations in your bag or storage area.
- Right next to the keyboard.
- On top of the computer tower.
- Balanced on the monitor.

Answer:

6. Why do digital animation studios enforce strict file backup protocols?

- To prevent weeks of production work from being lost during computer crashes.
- To stop students from drawing sketches.
- To change the color of the computer case.
- To make computer monitors turn off faster.
- To slow down the artist's typing speed.
- To delete the internet connection.

Answer:

7. Which software application is a free and open-source suite used globally for 3D modeling and animation?

- Scratch 3.0
- Google Chrome
- Calculator
- Notepad
- Blender
- Microsoft PowerPoint

Answer:

8. Which software is primarily designed for high-resolution digital sculpting of detailed biological creatures?

- Audacity
- ZBrush
- Microsoft Word
- Google Docs
- Scratch
- Windows Media Player

Answer:

9. What is the primary workspace window inside Blender where you view and build 3D objects called?

- The Spreadsheet
- The File Manager
- The Print Layout
- The 3D Viewport
- The Web Browser
- The Audio Mixer

Answer:

10. What should you do before unplugging any computer cables or headsets in Room 317?

Total Points: [10] [U1HW2 - W3 - 3D Graphics Basics]

- Cut the wire with scissors.
- Hide the cables behind the table.
- Ask the teacher for permission and ensure the computer is safely powered down.
- Switch off the main building power breaker.
- Pull the cord as hard as you can while the computer is running.
- Leave the cables tangled on the floor.

Answer:
